

Java Developer

About Us

Snapbytes is an Atlassian Platinum Solution Partner and Atlassian Top Vendor with proven expertise in ITSM, Agile, DevOps and Test Automation. We are trusted by thousands of local and global enterprises, helping them get the most out of their software and transforming the way they do business. With offices in İstanbul and Cambridge, we provide solutions to help our clients improve, automate and accelerate their processes.

At Snapbytes, we collaborate and share, we achieve everything together, we talk straight, and we believe in continuous change and innovation. Our employees are the key to our success. Come see for yourself!

About The role

For this Java Developer role, we are seeking people who have excellent communication skills, an appetite for learning new stuff, have java development experience (Android counts) and enjoy coding as a team.

As a Developer, you will work with the team to build our **new cloud native test automation product**, in all areas of product development from defining features to setting up pipelines to providing documentation and second level technical support. While building the product, you will have the opportunity to research and apply cutting edge technologies. While interacting closely with our customers, you will have the challenge and joy of maintaining and growing a code base with 'A' grade on Sonar analysis.

This role also plays a supportive function to the sales team to assist with pre-sales - providing estimates, technical guidance on new projects etc. These activities also include taking part in customer workshops to analyze their requirements and help them understand Test Automation and DevOps.

About You

Essential skills:

- Have a degree in computer science or in any other engineering or sciences.
- Have a minimum 2 years of professional work experience coding in Java.
- Familiar with Selenium and/or Appium test automation.
- Familiar with DevOps tools like Jenkins, docker, etc.
- Familiar with REST services and SQL databases.
- Able to work effectively independently as well as in a team environment.

- Comfortable working collaboratively both face to face and through online tools such (e.g. WebEx, Slack, Skype, etc.).
- Have a strong work ethic with good time management and the ability to work with diverse teams.
- Outgoing, loves to help people and has exceptional presentation skills. Must be comfortable explaining concepts on a whiteboard.
- Willing to step in and help other team members as needed. We're a team – so everybody does the dishes, there are no lone rangers here.
- Demonstrate excellent communication skills including the ability to effectively communicate with internal and external customers.
- Adaptable and enjoys engaging with external customers.
- Analytical, able to think on his or her feet and a fast learner.
- Self-starter in learning new technologies and procedures.
- Detailed and results oriented.
- Gets things done – efficient and organized.
- Fluent in written and spoken English.
- Have no military obligations or postponed for at least two years.

Optional skills:

- Experience with developing microservices using docker.
- Experience with Selenium and/or Appium test automation.
- Experience designing RESTful services.
- Familiarity with the linux systems and their command line.
- Experience within a fast-paced, fast-growth tech start-up environment.

To apply for this role, please send an application cv@snapbytes.com and we'll get back to you as soon as possible.
